

Mold Assessment

Our Mold Assessment provides you with specific guidance for addressing potential mold-related issues in your home.

Mold is Everywhere

Moisture + Organic Material = Mold

Mold spores are *always* present in the air

Mold causes health problems: Allergy, wheezing, difficult breathing, coughing, irritation to eyes and skin

Mold testing, combined with infrared, is the best non-invasive method to assess the extent and types of mold in your home.

Our Mold Assessment

Look

Scan

Sample

Test

We visually inspect your home for mold growth, utilize infrared cameras, collect samples, and analyze lab results.

Our hygienist reviews results and delivers the industry's *finest* mold inspection report.

If we identify issues, we provide you with specific recommendations and next steps.
